

Are you ready to leap to Minitab Statistical Software?

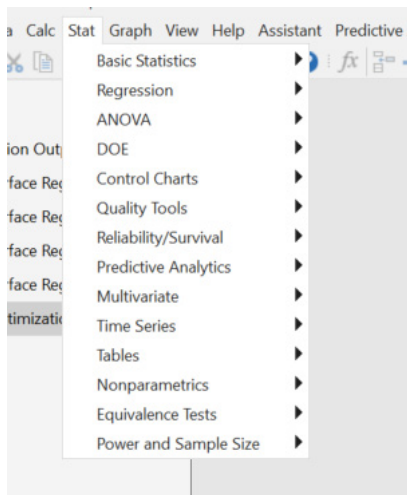

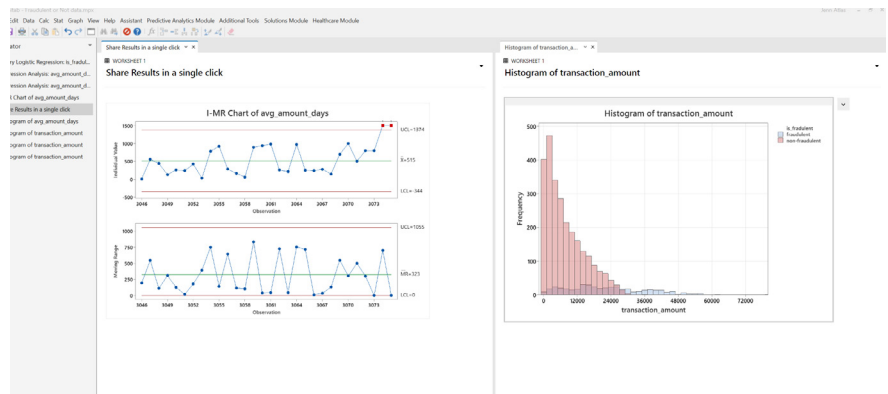

Switching to Minitab has never been easier. Discover why over 90% of Fortune 100 companies trust Minitab Statistical Software to empower them to make better business decisions.

5 Reasons to Consider Minitab

1: INTUITIVE INTERFACE

Our intuitive interface requires minimal effort to get started and is designed to make it simple for any data user to maximize value from their data.

With Minitab's intuitive menu system and powerful analytics, visualizations are easy to find. Data and results live in a single project file, making it easy to save and share your work.

2: COMPREHENSIVE COLLECTION OF METHODS

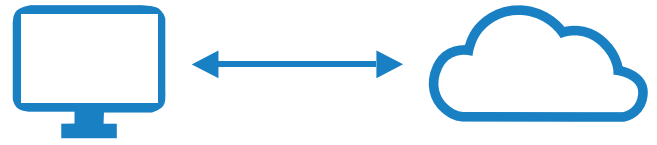

We were born in academia and raised in quality, so you'll find all the familiar statistical methods, an abundance of quality tools and modern predictive analytical methods to handle your ever-growing data projects.

Some of our most popular tools and statistical methods include:

- Predictive Analytics
- Quality tools:
 - Control Charts
 - Tolerance Intervals
 - Capability Analysis
- Power and Sample Size

3: ACCESSIBLE WHEREVER YOU ARE

You can make data-driven decisions anywhere, anytime. Users can choose between our traditional desktop application or use Minitab Statistical Software on the cloud.

4: SEAMLESS DEPLOYMENT, TRAINING & SUPPORT

Get started quickly and upskill your team with Minitab. Fast-track your proof of value through our proven deployment services, led by our industry and solution experts.

Our analytics consultants work closely with your team to understand your organization's needs to ensure a successful transition. From customer success, to workshops, to training opportunities, we'll provide expert support throughout your journey with Minitab.

"There was a lot of hesitance from one of our customers to switch to Minitab Statistical Software, but Minitab's sales and solutions teams quickly alleviated any concerns. Minitab was the ideal solution to deploy the global manufacturer's OPEX program. Our solutions engineers and analytics consultants provided deployment and training support to thousands of users across the globe in their local language. This was the best customer support the customer has ever seen!"

-Jim Oskins, Engineer with experience across automotive and consumer goods

5. MARKET-LEADING SOLUTIONS ANALYTICS ECOSYSTEM

With over 50 years of experience, we understand that analyzing data is only part of the story. Data access and preparation play a key role in every successful analysis, along with tools to help you identify problems to solve and data to collect. Minitab Solutions Analytics™ is our integrated approach that provides software and services that enable you to make better decisions that drive business excellence. Minitab's ecosystem is the only one that enables an end-to-end solution, from data access, to aggregation, to analysis so you get the most out of your data.

Our expert team has extensive experience in problem-solving, data engineering, statistical analysis, and data science. Whether you're just getting started or want to take your analytics to the next level, we're here to help.

"Minitab has been trusted for more than 50 years to provide expert analyses. Now you can get needed answers from new data automatically, and instantly share results via the cloud. How much time can you save by answering challenging questions from leadership before they are even asked?"

- Rob Lieverse, Experienced Quality leader across pharmaceuticals and manufacturing
